## THE PATHWAY TO BECOMING A PILOT

The pathway to becoming a qualified & fully licensed pilot has many parts, but in simple terms, here's what graduates can expect as they progress from basic training, through our course, and out and into industry.

## Is a degree required?

Gaining entry into a career as a commercial pilot does not require a degree. For students academically inclined who want to enhance their qualifications, a university degree is worth considering. Importantly our flight training can be undertaken while you do a degree - saving time and getting you industry ready sooner.

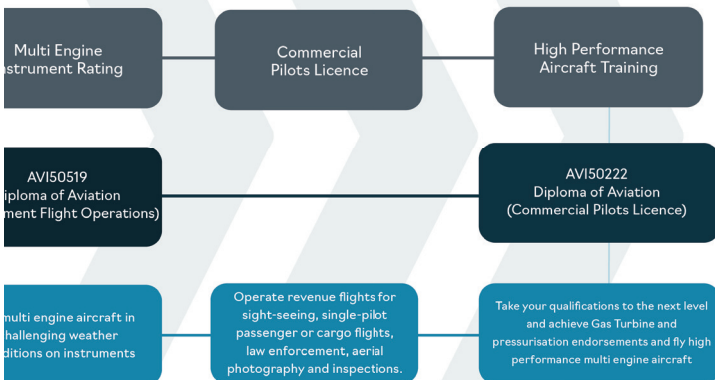

## How do I know if I am suitable to be a pilot?

As part of the application process all potential students are required to undergo the ADAPT aptitude assessment. This is a great tool to identify strengths and areas that could be worked on.

There is also an opportunity to experience a Trial Introductory Flight (TIF).

18 MONTHS

## TRAINING DELIVERED BY PEOPLE WHO KNOW HOW THE INDUSTRY WORKS.

### Scenario Based; Real Life Training Makes a Difference.

Over the last 30 years, Flight One School of Aviation (formerly Australian Wings Academy) has established a solid, industry-recognised reputation for producing commercially ready career pilots. Students benefit from a team of highly skilled, dynamic and experienced instructors utilising a diverse fleet of training aircraft, blended learning methodologies and a syllabus that is uniquely ours. Our ground school instructors are leaders in the delivery of theory which transforms to our students achieving amazing results. Ground School subjects are intertwined with flying.

Being well prepared to transition from your training to your first job in industry is critical to career success. With small ab-initio cohorts, our students have the advantage of learning with a group of peers at a similar level of ability whilst enjoying a professional, structured training experience.

Our fleet includes a cutting-edge range of aircraft types and choices. There is the option to include Upset Prevention and Recovery training in an ex-Military CT/4 and high-performance training in the Beechcraft King Air B200. ALSIM AL250, ALSR20 and Redbird FMX are our industry certified simulators - the latest technology which provides a realistic advanced training experience.

### Training Delivered By Industry.

Flight One School of Aviation is part of the Tisdall Aviation Group, a private group of companies delivering comprehensive aviation services, including charter, brokerage, maintenance, & aviation training.

### Extensive, Modern Fleet.

The group have a diverse fleet of aircraft that are utilised in Charter and Flight Training. From Cessna 172s to Cirrus SR22s, Beechcraft Barons and the high performance King Airs, our fleet of in-house maintained aircraft will put you in a great position for employment.

### Cutting-Edge Flight Simulators.

Developed by ALSIM, our industry certified simulators provide a realistic advanced training experience and access to a range of scenarios to reinforce theory training & prepare for flight.
